

2005 PROFESSOR SEMINAR SCHEDULE

Seminar	Date	Location	Registration Fee
University Professors' Masonry Workshop	March 13 – 14	University of Minnesota Minneapolis, MN	\$275 before 2-4-05 \$325 after 2-4-05
ACPA Concrete Pavement Workshop	June 6 – 8	ACPA Offices Skokie, IL	\$695
ACBM Undergraduate Faculty Enhancement Workshop	June 26 – 29	PCA Offices Skokie, IL	\$195
PCA Buildings Seminar	August 1 – 3	PCA Offices Skokie, IL	N/A
PCA Bridges Seminar	August 4 – 5	PCA Offices Skokie, IL	N/A

University Professors' Masonry Workshop . . . Now in its 17th year, the University Professors' Masonry Workshop provides professors with the resources and background needed to effectively teach masonry design and construction classes at the university level. As a workshop participant, you'll hear leading professors, practitioners and industry leaders relate the newest ideas in masonry education and research. The workshop features three separate tracks, one on architecture, a new one on construction management, and a third other on engineering, plus numerous joint sessions on masonry materials, design, and construction. You will have the opportunity to try your hand a brick laying at the Masonry Building Demonstration, while watching experts lay masonry. You will also receive a wealth of valuable information and gain helpful contacts as you need with your colleagues and leading masonry professions. For more information, contact the Masonry Society at (303) 939-9700 or John Melander at PCA (847) 972-9054.

ACPA Concrete Pavement Workshop . . . This seminar, exclusively for university professors, is designed for college professors teaching at the undergraduate level, particularly those teaching courses in transportation, pavement design, construction and related areas. The seminar will review current concrete pavement design, construction, and rehabilitation procedures, as well as update the attendees on performance and economic factors related to concrete pavements. The seminar has been expanded to focus more on the latest pavement design method, the 2002 mechanistic-empirical design procedure, and state-of-the practice construction methods. ACPA will provide attendees with more than \$1,000 worth of teaching materials, lesson outlines, literature, and computer programs. For more information, contact Mike Ayers at ACPA (217) 621-3438. To register, contact Debbie Howard at (847) 966-2272.

ACBM Undergraduate Faculty Enhancement Workshop . . . This workshop will address the issues of adding and expanding coverage of concrete materials properties in undergraduate and graduate courses and laboratories. The goal of the workshop is to provide a forum to introduce the most current research in concrete materials properties. Participants will learn how to effectively facilitate teaching of concrete, see demonstrations and hear explanations on student laboratory experiments, and exchange information on successful implementation of concrete-related subject matter into curricula. For more information, contact Julie Clausen at (847) 972-9032.

PCA Buildings / Bridges Seminars . . . Participants will receive a binder filled with literature, and a copy of PowerPoint and other useful materials. All handouts are designed to help the professors implement the latest industry practices in their courses. To register, please contact Caron Johnsen at (847) 972-9058
